Professional Summary

Docs-as-Code & API Infrastructure Specialist with extensive enterprise experience managing migration lifecycles, automated quality gates, and developer ecosystems. Proven track record migrating legacy environments to Git-based repositories and managing backend architecture specifications for high-volume environments (550+ active endpoints). Adept at accelerating engineering shipping velocity by establishing programmatic style governance and handling cross-functional technical alignment in fast-paced Agile environments.

Technical Skills

- **API & Core Automation:** REST API Documentation, OpenAPI / Swagger Specifications, Bruno, Prism, Postman, JSON, XML, Markdown, PowerShell scripting.
- **DocOps & CI/CD Pipelines:** Git version control, Bitbucket, GitHub Actions, Vale CLI (automated linting & governance), Antora static site generation.
- **Information Architecture:** Content Modeling, Taxonomy Management, Enterprise Data Migration, Structural Layout Optimization.
- **Systems & Workflows:** Jira, Rally, ServiceNow, KACE Systems Management, Active Directory administration.

Professional Experience

Sabre Corporation *Technical Writer II* **08/2022 - 03/2026**

- **Enterprise Migration Execution:** Programmed and executed the technical migration of the global developer documentation ecosystem from legacy Drupal CMS architecture to a decentralized, Git-based Docs-as-Code model via Bitbucket and GitHub.
- **API Lifecycle Management:** Audited and interpreted backend architecture and authentication protocols to manage the live OpenAPI specifications and Developer Experience (DX) layer for the Sabre Dev Studio platform, tracking 550+ active endpoints.
- **Automated Quality Governance:** Engineered and deployed automated style-guide enforcement pipelines utilizing Vale CLI, eliminating manual auditing latency and shifting compliance validation directly into active developer pull request (PR) workflows.
- **International Knowledge Transfer:** Architected technical training frameworks and led dedicated knowledge transfer (KT) sessions for distributed cross-functional teams in Poland and India to standardize branching strategies and branching etiquette.

Blueprint Technologies *Microsoft Teams SME (Consultant)* **11/2020 - 08/2021**

- **Cloud Infrastructure Consulting:** Embedded within Microsoft's FastTrack Engineering Center to deliver process-driven infrastructure guidance for architecting and migrating enterprise Microsoft 365 cloud communication environments.
- **Identity & Access Management:** Configured and managed enterprise directory environments using Active Directory, Azure Active Directory Connect, group permissions, and user account privilege mapping.
- **System Automation:** Utilized PowerShell scripting to programmatically configure, patch, and administer Lync Server and Skype for Business structures during high-volume tenant migrations to Microsoft Teams.

HCL Tech (Formerly TEKsystems) (Stanley Black & Decker) *IT Field Service Operations Engineer*
03/2019 - 11/2020

- **Critical Incident Triage:** Executed real-time event and change management workflows under strict SLAs for Severity 1 (P1) and Severity 2 critical infrastructure outages at Stanley Black & Decker.
- **Systems Administration:** Utilized Active Directory to modify user security configurations, manage network share access privileges, and enforce organizational Group Policy Objects (GPOs).

Carolina Beverage Group *Junior System Administrator* **08/2017 - 01/2019**

- **Infrastructure Management:** Spearheaded system inventory tracking and endpoint configuration management utilizing the KACE Systems Management Appliance (SMA) across multiple regional enterprise sites.
- **Account Provisioning:** Managed Windows Server user provisioning workflows within Active Directory and handled messaging architecture privileges inside the Microsoft Exchange Administration Center.

Education & Certifications

Colorado State University-Global Campus

Completed Bachelor of Science, Information Technology **12/2019**.

Honors and Awards

DevPortal Awards Nominee (Sabre Dev Studio) **2024**.

Sabre Dev Studio was recognized and nominated for its high-quality developer portal experience, API reference architecture, and documentation ecosystem supporting thousands of global external developers.
